Everything began when the universe was created. The element of light separated from the element of darkness and became the water element. When the water element was formed, the consciousness that had existed in the darkness element, known as darkness, began to shine as the new element. In the newly created universe, darkness, which had been nothing more than an element of nothingness, tried to pull all of the elements that existed, and created the Void. Darkness was a miracle in itself, creating all of the elements in one moment. From this point on, darkness would be the root of all evil. Even though darkness is the cause of evil, many of the Elden and the Beastmen—who had split off from the Elden—decided that they needed darkness in order to create the World of Light. Their ambition was to rule the world, despite its many problems, with the existence of darkness. This game is great! i would actually recommend not downloading it from PSN and buying a copy. It does take a couple of hours but is a well worth it. The game is gorgeous and the amount of customization you can get is pretty impressive. The game also has a much easier experience than the other fantasy rpgs, and doesn't have the filler that those games have. I would say to anyone looking for a fantasy rpg go download this one. I would like to preface this by saying that the game is extremely short and it doesn't take long to complete the game. The combat is smooth and fast. Every class has a unique function and the skills are a lot of fun to use. The most difficult part is the bosses! The bosses are all pretty hard and require a lot of technique. The story is pretty interesting as well and has a lot of depth to it. I would recommend the game because it makes you think. I would also recommend that you get the game early because you can get a good deal on the sequel if you do. The game is \$20 on PSN. ...
