That is why I want to keep the file and hide the password. I tried to save the file in notepad but the file format is such that notepad always convert it to the standard Windows text so I cannot do it. (CNN) Ashleigh Claire McLaughlin says when she was 11 she went through a period where her mood was so low, she was on the verge of suicide.

"At this point, I was thinking about death and about letting myself die," she said. "It's been a gradual thing but I was thinking about how much I wanted to be dead, how much I wanted to die, how I never wanted to feel that way again." She was constantly thinking about ways to off herself. She often played video games where she was jumping in front of cars and off cliffs. She played online death games where she killed other players. She also didn't want to be around people. After calling her mom she would say, "I don't want to see you, I'm not going to see you again." When she was a passenger in her own vehicle, she would hide her face. And at school, she wrote letters to people at home saying she was going to kill herself. "I would write people off, everyone I knew, including my own family, to whom I was very close. I would write them and say, 'I'll see you in heaven, I'll see you on the other side, I'm going to kill myself.'" After about a year of thinking about suicide she tried to take her own life. "I spent much of the night trying to figure out how to take my own life," she said. "At one point, I took some pills and tried to kill myself. I had no idea what to do, how to die, how to feel when I died. I was just trying to figure it out. I didn't really know what to do and I was panicking so I was like 'I'm just going to go back to bed because I'm not sure what to do.'" Then, a friend's brother called, he was a survivor of suicide. And she says that changed her life. "My friend who had gone through

A: It seems that youtube-dl is converting the download URL's. How about this: `page=1 while(true){ res=$(youtube-dl -f "$OPT_f" -- "$YOUTUBE_LIST" -- "$START_URL" "$PAGE" "$OPT_t") case $res in 400) # unexpected invalid request. echo "ignoring" ;; 200|301) if ["$res" != "200"];then echo "ERROR loading page $PAGE!" echo $res fi ;; 200) # download SUCCEEDED ;; *) # some other error. echo "ERROR while loading page $PAGE: $res" continue ;; esac page=$((page+1)) done` You might want to check the \$PAGE variable. I have no idea where you acquire it. Q: What makes something a "science-fiction concept"? In two recent comments on this site, the author highlighted a concept as science-fiction. I did some research: Sci-fi was originally an alternative universe concept, but science fiction now tends to the be... Can someone clarify what a "science fiction concept" is? A: It is a concept in science fiction. The original definition of SF was, at least among older people, "science fiction" for literature and short stories, that is, a new kind of fiction. Speculative fiction was the term for the new, more imaginative stories by people like Ray Bradbury and Isaac Asimov. The speculative novel was a hybrid genre, however, since it included those things.
